

macOS 11 Big Sur compatibility information

These statuses are for macOS 11 (Big Sur) and macOS 11 (Big Sur) on Apple M1 Chip.

Following way to use is not guaranteed.

- Use USB port of AirMac Extreme etc.
- Use shared printer of OS X funcion.
- Use remote Connection.

•If you are using the 180 ° rotation function, check "Reverse page orientation" in "Layout".

•If you are using a Mac PC with an Apple M1 chip, there are the following restrictions.

(1)Clicking the "Open Print Queue" button may not open the printer queue.

In that case, the printer queue function cannot be used.

In this case, printing cannot be stopped from the printer queue, so click the "Cancel" button on the printer to cancel the print job.

The "test print" function cannot be used.

(2)Even if you click the "Open Scanner" button, the scanner setting screen may not be displayed.

When using the scanner function, use the OS standard application "Image Capture".

•PS (for Fiery C9 Server) is information only for a Mac PC with an Intel processor.
